In the middle is a golden-brown **eagle** holding a cross in its beak, a green olive branch in one claw and a sceptre in the other.

On the eagle's shield is the head of an **aurochs**, a huge wild ox that once roamed the land, with a star, a rose and a crescent moon around it.

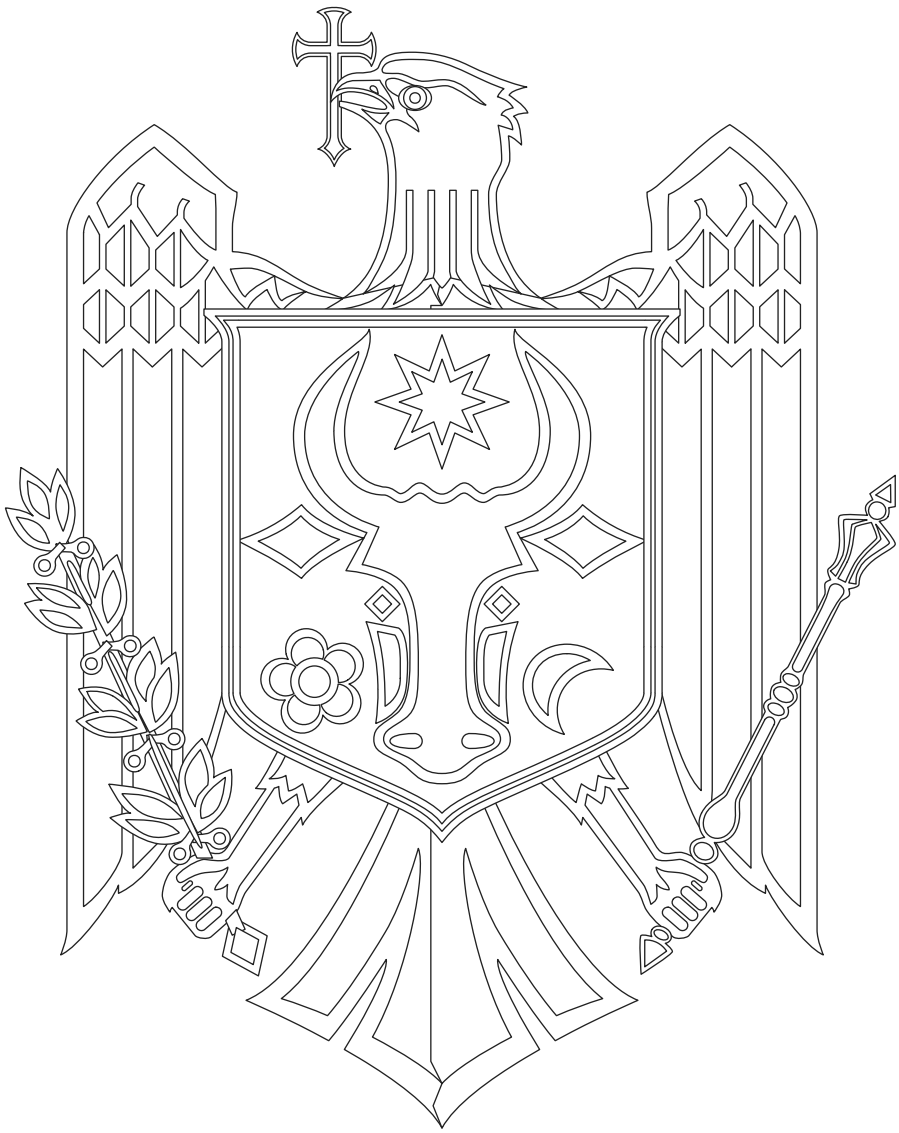

The three colours are shared with neighbouring **Romania**, with whom Moldova shares a language and much of its history.

Moldova is famous for its **vineyards and wine**. It has some of the largest underground wine cellars in the world, with miles and miles of tunnels full of bottles!
