DID YOU KNOW?

The **crescent and eight-pointed star** are symbols of Islam and Turkic heritage — the star's eight points are often said to stand for the eight branches of the Turkic peoples.

Azerbaijan is known as the **"Land of Fire"** — natural gas escaping from the ground has kept flames burning on the Yanar Dag hillside for centuries.

Azerbaijan sits on the **Caspian Sea**, the largest inland body of water on Earth, on the boundary between Europe and Asia.

The flag was first raised in **1918** by the Azerbaijan Democratic Republic — the first secular democratic republic in the Muslim world — and was restored in 1991.
