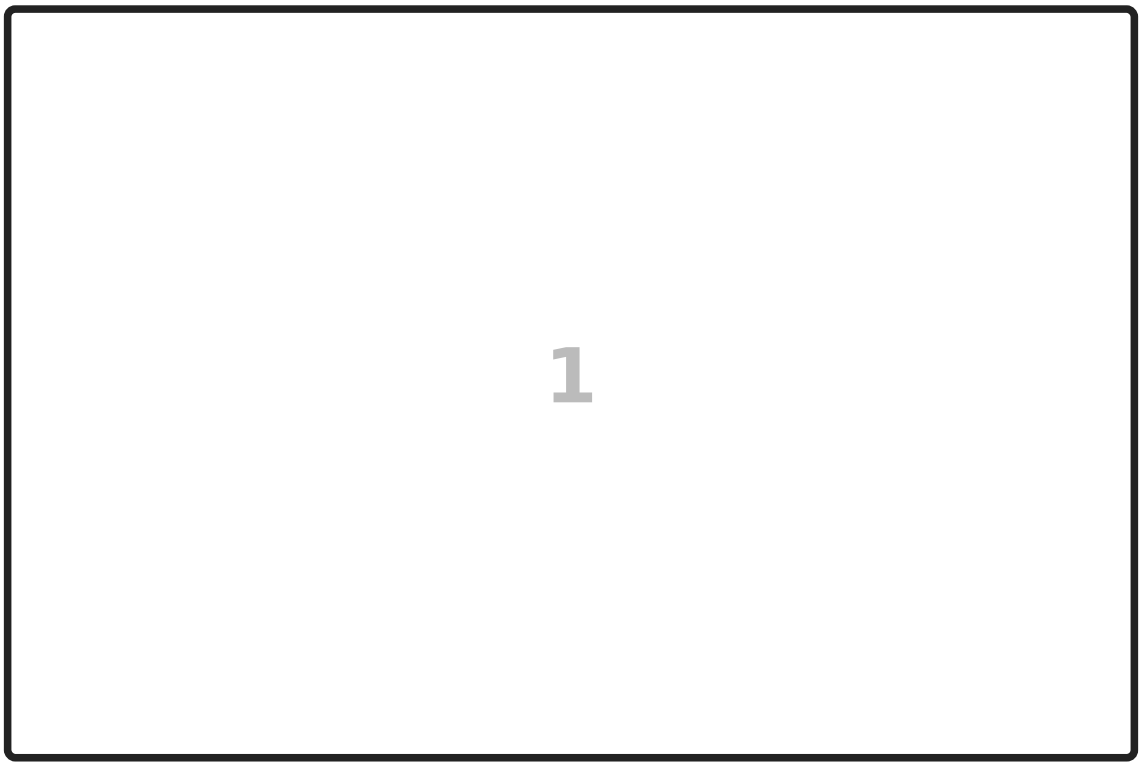
Saudi Arabia Flag Colouring Page

Easy



COLOUR GUIDE

1 **Green** The whole flag

DID YOU KNOW?

The white writing on the real flag is the **Shahada**, the most important statement in Islam. Because it contains holy words, the flag is treated with great care — it is never lowered to half-mast and never printed on things that could be thrown away.

The Saudi flag is one of the very few in the world with **no back side**! The writing is made to read correctly from both sides, so the holy words are never shown backwards.

The **sword** beneath the writing stands for strength and justice, and for the founding of the kingdom of Saudi Arabia. The **green** colour is a traditional colour of Islam.

Saudi Arabia is a large desert country in the Middle East. It is home to the holy cities of **Mecca and Medina**, which millions of Muslims travel to each year.
